

# Solve long-term crime problems

In this 12-week course students will learn to examine long-term problems and how to recommend effective strategies to combat crime and disorder issues within their jurisdiction by applying criminology theory and research methods. The course focuses on the operational application of problem-oriented policing, including environmental criminology and situational crime prevention, through thoughtful directed discussions with colleagues. Utilizing the "Crime Analysis for Problem Solvers in 60 Small Steps" this course will help outline how analysts can contribute to proactively solving crime and disorder problems in their jurisdictions.

## A format for your busy schedule

This class is held online over 12 weeks. There are no live sessions, so you can complete the work whenever it fits your schedule! If you get busy and can't complete the work, you can transfer to a later session without having to pay the full fee again.

This course assumes that the student knows basic crime analysis skills including understanding how to use various crime analysis computer applications and manipulate data, identify hot spots and how to relate them, produce charts, graphs, and reports, and have a basic knowledge of statistics and research methodology.

## Why Choose Us

-  Each 12-week class is worth 4 points towards CLEA testing eligibility and awards a certificate upon completion.
-  Online classes are only \$395 for IACA members or \$445 for non-members.
-  The IACA is the premier source for crime analysis training. Combined, over 3200 analysts have taken an IACA course!
-  Build a strong foundation of the concepts, techniques, theories, and skills most useful to crime analysts

## Weekly Outline

- Week 1-What is POP/problem analysis
- Week 2-Environmental criminology
- Week 3-Scanning a problem
- Week 4-Analyzing a problem, part 1
- Week 5-Analyzing a problem, part 2
- Week 6-Analyzing a problem, part 3
- Week 7-Responding to a problem
- Week 8-Problem assessment
- Week 9-Presenting the problem
- Week 10-Operationalizing problem analysis
- Week 11-Capstone Project
- Week 12-Capstone Project
