

Level up your Analytical Skills

This training is dedicated to "Cracking the Code: Pattern Analysis for Law Enforcement Analysts," an intensive 12-week course designed exclusively for law enforcement analysts. This training will equip you with the advanced skills required to detect complex crime patterns and trends, transforming you into an analytical expert capable of tackling even the most challenging cases. Students will develop proficiency in pattern analysis, enhance critical thinking, learn to apply pattern analysis in a variety of domains, learn the importance of collaboration and info sharing, understand legal/ethical considerations, and learn to analyze complex data effectively.

A format for your busy schedule

This class is held online over 12 weeks. There are no live sessions, so you can complete the work whenever it fits your schedule! If you get busy and can't complete the work, you can transfer to a later session without having to pay the full fee again.

This class is recommended for analysts with 2-3 years of experience. You will need an understanding of basic crime analysis principles as well as a basic understanding of MS Excel.

Why Choose Us

-  Each 12-week class is worth 4 points towards CLEA testing eligibility and awards a certificate upon completion.
-  Online classes are only \$395 for IACA members or \$445 for non-members.
-  The IACA is the premier source for crime analysis training. Combined, over 6500 analysts have taken an IACA course!
-  Build a strong foundation of the concepts, techniques, theories, and skills most useful to crime analysts
